

Chapter 1: Introduction

Product Overview	1
Three Transaction Architecture	2
XPED Transaction	3
XPRT Transaction	4
XPSP Capabilities	5
Source-Level Testing and Debugging Facilities	6
CICS Storage Protection Facilities	7
File Utility	8

Chapter 2: Usage

TSO Interface	1-2
Help Facility	3
Common Screen Fields	4
Command Entry	5
Common Primary Commands	6-7
Common Line Commands	8-10
Preparing a Program for Execution	11
COBOL Compiler Options	12
Newcopy	13
Fast-Path Access to Source Listing Screen	14
Direct Access	15
Exiting XPEDITER/CICS	15

Chapter 3: Setting and Configuring

Setting Storage Protection	1-2
Testing a COBOL Program	3
Program Abend	4
Debugger	5
File Utility	6-9
DB2 Easy Query	10-13
Turning on CICS Abend-AID	14
CICS Abend-AID Directory: Viewing	15
CICS Abend-AID Diagnostics: Viewing	16
Profile: Setting Up	17
PF Key Settings: Changing	18
Profile Defaults: Changing	19
Profile Defaults: Saving	19-20
Profile: Loading	21

Chapter 4: Debugging Programs

Browsing Records in a File	1-3
DB2 Easy Query	4-5
List of DB2 Tables: Accessing	6-7
SQL Easy Query: Building	8-9
DSNC Abends and SQL Codes: Accessing	10
DB2 Storage: Accessing	11
CICS Storage Areas: Accessing	12
Chaining Through CICS Storage Areas	13-14
CICS Table Entries: Displaying	15
