

Chapter 1: Getting Started

File-AID/Batch: Purpose and Function.....	1
File-AID/Batch: Accessing and Using.....	2
Function and Modifier Descriptions.....	3
Parameter Descriptions.....	3

Chapter 2: Coding

Coding Rules.....	1
Control Cards.....	2
Dataset Identifier.....	2
Function/Dataset Organization Identifier.....	3
Parameter Identifier.....	4
Location Element.....	4
Length Element.....	5
Operator Element.....	5
Data Element.....	6
Scanning Parameters.....	6
Comments.....	8

Chapter 3: Managing Data

Copying Data.....	1
Deleting Data.....	1
Printing Data.....	2
Changing Data.....	2
Comparing Data.....	3
Reformatting Data.....	3
Changing JCL.....	4
Accumulating Values.....	4
Creating Extract Files.....	4
Inserting Records.....	4
Input Dataset Requirements.....	5
Blocked and Unblocked Datasets.....	5
Variable-Length Record Datasets.....	5
JCL Required for Execution.....	6

Chapter 4: File-AID Commands

COMPARE.....	1
COPY: C.....	2
DROP: DR.....	3
DUMP: D.....	4
FPRINT: FP.....	5
LIST: L.....	6
PRINT: P.....	7
RLPRINT: RLP.....	8
SCP: SCP.....	9
SPACE: S.....	10
TALLY: T.....	11
UPDATE: UP.....	12
USER: US.....	13

Parameters.....	15
ACCUM: A.....	18
AND.....	19
CEM.....	20
DFLT_WRITE: DW.....	21
DROP: DR.....	22
DUMP: D.....	23
IF.....	24
IN: I.....	26
LIST: L.....	27
MOVE: MV.....	28
ORIF: OR.....	30
REPL: R.....	31
STOP: ST.....	32
Logical Conditions.....	33
Coding Logical AND Conditions.....	33
Coding Logical OR Conditions.....	33
Selecting Members by Content.....	34
DUMP Records.....	35

Chapter 5: Programming Techniques

Create Test File.....	1
Fixing a Bad Numeric.....	2
Backup.....	3
Report Totals.....	4
Split Files.....	5

Chapter 6: Reformatting Records

Reformatting Records.....	1
New Reformat Definition - Creating.....	2
Source and Target Record Layouts - Identification.....	3
Reformat Definition Editor.....	4
Example: Initializing New Fields.....	7
Selection Criteria - Establishing.....	8
Executing the Reformat Online at a Terminal.....	9
Specifying the Input and Output Datasets.....	9
Reformatted File - Browsing.....	10

Chapter 7: Compare File

Comparing Files.....	1
Accessing the Compare Function (Option 10).....	2
Specifying the "New" Dataset.....	3
Specifying Execution Options.....	4
Selecting the Compare - Criteria Options.....	5
Specifying Formatted Field Criteria.....	6
Executing Compare.....	7
Analyzing the Compare Report.....	8
Viewing the Compare Summary Report.....	9
