

Chapter 1: Fundamentals of DB2

Relational Data Base Systems.....	1
IBM's Relational Data Base Products	2
DB2 at a Glance	2
Major Benefits of DB2	3
The DB2 Operational Environment	4
MVS Batch Job Submission	5
MVS: CICS, IMS, and DB2	6
Products Which Work with DB2	7
SQL: Structured Query Language.....	8
Embedded SQL	9
Static SQL	9
Dynamic SQL	9
Java Database Connectivity and Embedded SQL for Java Programs.....	10
Tables	11
Base Table	11
Views	12
Aliases	13
Indexes	14
DB2 UDB Clients.....	15
Privileges	16

Chapter 2: Structured Query Language

Introduction to SQL	1
DB2 through ISPF Menus	2
DB2 Panels	2
DB2 Primary Selection Menu	3
Program Development Aids	4
SPUFI: SQL Processing Using File Input	5
How to Use SPUFI	5
SPUFI Menu	6
SPUFI Default Menu	7
Embedding SQL Statements	8
DB2 Application Program Structure	9
Program Preparation Process	10
Program Preparation Panels.....	11
DB2 Program Preparation Menu	12
DB2 Default Panel	13
Precompile Panel	14
Bind Panel.....	15
Compile, Link, and Run Program Preparation Panel	16
SQLCA.....	17
Defining the SQLCA in Working-Storage.....	17
SQLCA Fields.....	18
SQLCA: SQL Communication Area	18
Whenever Statement.....	19
Result Table.....	20
Data Types.....	20
Selecting Some Columns: SELECT column-name.....	21

Chapter 4: SQL Functions

Definition and Purpose	1
Column Functions.....	2-3
Scalar Functions.....	4
Scalar Functions: Returns and Examples.....	5-10
Commonly Used Scalar Functions	11
CHAR Function	11
DECIMAL	11
VALUE	12
NULLIF	12
User-defined Functions.....	13
Column Functions	14
Commonly Used Column Functions	15-17
Scalar Functions	18
ABS or ABSVAL	19
ASCII	19
CHAR	19
COALESCE.....	20
DATE	20
DAY	21
DAYOFWEEK	21
DAYOFYEAR	21
DIGITS.....	22
HEX	22
LCASE/LOWER	23
LENGTH	23
LTRIM	24
RIGHT.....	24
SUBSTR	25
VALUE	25

Chapter 5: Table and View Design

Table Design.....	1
Logical Table Design	1
Table Considerations	1
Columns Considerations	2
Columns Consideration: NULL or NOT NULL?.....	2
Columns Considerations: NOT NULL with Default.....	3
Columns Considerations: Validation Routine for a Table	3
Columns Considerations: Edit Routine	4
Columns Considerations: Field Procedure	4
Physical Table Design	5
Design Storage Groups	5
Designing a DB2/SQL Data Base: Definition	6
Concurrent Access	6
Simple Tablespace	7
Partitioned Tablespace	7
Segmented Tablespace	8
Options on CREATE TABLESPACE.....	9-11
Characteristics of Table Names	12

Naming Result Columns: AS.....	21
SQL Rules for Processing a SELECT Statement	22
Comparison Operators Used in Conditions	23
Selecting Rows that Have Null Values	23

Chapter 3: Retrieval and Update Operations

SELECT Statement	1-2
Sample Tables	3-7
AS column name in SELECT	8
Five Built-in Functions	9
Concatenation Operator	10
Keywords Used with SELECT Statements	11
BETWEEN...AND (or NOT BETWEEN)	12
AND	12
OR	12
IN (or NOT IN)	13
LIKE (or NOT LIKE)	13
IS NULL (or IS NOT NULL).....	13
Joining Data from More than One Table.....	14
Subquery.....	15
Correlated Subqueries.....	16
Retrieval Operations.....	17-18
JOINS	19-20
INNER JOIN	19
OUTER JOINS	19
Subquery: Basic Predicate	21
ALL, ANY, SOME Operator	21
EXISTS Keyword	22
WITH Clause of SELECT	22
OPTIMIZE FOR Clause Requests	23
INSERT Statement	24
INSERT Statement: Examples	25-26
DELETE Statement	27
DELETE Statement: Examples	28-29
UPDATE Statement	30
Format 1: Examples	31-32
UPDATE with Subquery Examples	33
UPDATE Format 2	33
Case Expressions.....	34
UNION Keyword	35
UNION: Merging Lists of Values	35
UNION: Eliminating Duplicates	35
UNION: Keeping Duplicates	36
Special Registers.....	37
Working with Declared Temporary Tables.....	38

Check Constraints	13
CREATE TABLE - UNIQUE Clause	14
LOCKSIZE on TABLESPACE	15
LOCKMAX	15
Available Bytes in a Page	16
Column Length and Data Types	17
Byte Count	17
Additional Facts About Data Types	18
How Many Tables for Each Tablespace?	19
One Table for Each Tablespace	19
Several Tables for Each Tablespace.....	20
Exit Routines for EDITPROC, VALIDPROC, and FIELDPROC.....	21
Audit Trace	22
DB2 Commands for the Trace	22
Create Table Options	23
Referential Integrity	24
Primary Key	24
Foreign Key	25-26
Table Space Calculation	27
Example: Table Space.....	27
Designing Indexes	28
Clustering Index	28
Partitioned Index	29
Index Design Considerations	30-31
Index Space Calculation	32
Example: Index Space Calculation.....	33
Designing Views	34
View Restrictions.....	35
Use of Catalog in Design	36
Package and Plan	37

Chapter 6: Embedded Retrieval and Update Operations

OPEN CURSOR, FETCH CURSOR and CLOSE CURSOR Statements	1-9
AS column name in SELECT	10
Five Built-in Functions	11
Built-in Functions: Examples.....	12-17
Arithmetic Expressions	18-19
Other SELECT Statement Clauses	20
GROUP BY Clause	20-21
HAVING Clause	22
ORDER BY Clause	23-24
VALUE Function	25
Keywords Used with SELECT Statements	26
UNION: Combining Two or More SELECT Statements	26-27
INSERT Statement	28
INSERT Statement Examples.....	28-32
DELETE Statement	33
Examples of the DELETE Statement: Using Format 1 and Format 2	34-40
UPDATE Statement.....	41-42
Format 1 Examples	43-51
UPDATE with Subquery Examples	52
UPDATE	53

Chapter 7: DB2 Architecture	
Physical Page Format	1
Page to Control Interval Relationship	1
RID: Record Identifier	2
RID to INDEX Relationship	2
Index Facts	3
Types of DB2 Indexes	3
Non-Clustering/Clustering Index	4
Chapter 8: Locking	
DB2 Data Integrity Philosophy	1
Understanding Locking	2
Resources Which Can be Locked	2-3
Effect of Intent Locks	4
User Influence: LOCKSIZE Parameter	5
LOCKSIZE Override at BIND	5
Lock Escalation during Execution	6
Types of Locks Available	7
User Influence: Duration of Locks	8-9
Duration of Tablespace Locks	10
Duration of Page Locks	11
User Influence: Explicit Locks	12
Tablespace Lock Deviation	13
Lock Granularity Per Package	14
Determining Locks Taken	15
Chapter 9: Performance	
Catalog Impact	1
Input to the DB2 Optimizer	2
Optimize FOR Clause	2
Access Strategies	3
Non-segmented Tablespace Scan	3
Segmented Tablespace Scan	4
Matching INDEX Scan	4
Non-Matching Index Scan	4
Multiple Index Access	5
Clustered vs. Non-Clustered Index	5
Predicate Evaluation in DB2	5
Compound Index Considerations	6
Joins	7
Nested Loop Join	7
Merge Scan Join	7
Hybrid Join	8
EXPLAIN Results	9-10
Isolation Level	11

Chapter 10: EXPLAIN Command	
Purpose and Function	1
EXPLAIN Format	2
Syntax	2
BIND	3
REBIND	4
Plan Table	5
Reading the Plan Table	6-7
Plan Table Housekeeping Information	6
Determining Access Path	8
How the Join Was Performed	9
Chapter 11: Query Management Facility	
Purpose and Function	1
Iterative Processing for Form and Report	2
Component Parts of QMF	3
The Panels	4-5
QMF Commands	6
Operator Aids	7
QMF User Profile	8
The Query Languages	9
QBE Example	10
Types of Data Manipulation	10
Examples of Generated Reports	11
Report Formatting	12
Basic Reports	12-13
Advanced Report Formatting	14
Temporary Storage	15
Saving QMF Temporary Storage Areas	15
Procedures	16
