

Chapter 1: Introduction

What is a Database? 1
 Traditional File Organization versus Database Organization 1
 The Objectives of a Database Management System 2
 What is IMS DB DL/1? 3
 IMS DB DL/1 4
 Components of IMS-DL/1 5-6
 DBD: Database Descriptor Block 7
 PSB: Program Specification Block 7
 PCB: Program Communication Block 8
 ACB: Application Control Block 8
 DL/1 Overview 9
 Application View 10

Chapter 2: IMS-DL/1 Structure

Database Hierarchy 1
 Database Hierarchy Chart 2
 DL/1 Database Segments 3-4
 DL/1 Database Records 5
 Parent and Child Segments 6-7
 Twins and Siblings 8
 Segment Limits and Sensitivity 9
 Processing Options 10
 Key (Sequence) Field 11
 Search Field 12
 DBDGEN Process 13-14
 DBDGEN Example 15-16
 PSBGEN Process 17-18
 PCB Examples 19

Chapter 3: Program Structure and Interface to IMS

Program Structure and Interface to IMS 1
 Application Program Interface with DL/1 2
 PCB Mask 3
 PCB Mask - COBOL Coding Example 4
 Calls to DL/1 5
 Segment Search Arguments 6-7
 Unqualified SSA 8
 Qualified SSA 8
 Segment Search Argument Command Codes 9
 Status Codes Returned After Database Calls 10
 DL/1 COBOL Program Structure 11
 JCL Examples 12
 DL/1 COBOL Compile and Link JCL Example 12
 Execution JCL 13

Chapter 6: Advanced Techniques

Command Codes 1
 'C' Command Code 1
 'D' and 'N' Command Codes 2
 Retrieving a Path 3
 Replacing after a Path Call 3
 Deleting After a Path Call 4
 Inserting a Path 4
 'L' and 'F' Command Codes 5
 '-/(Null) Command Code 5
 'U' and 'V' Command Codes 6
 'P' Command Code 6
 Boolean Operators 7
 Multiple Positioning 8
 Examples of Multiple Positioning 9
 Example: Multiple Positioning: Using the GET-NEXT-WITHIN-PARENT Call 10
 Example: Multiple Positioning: Using the GET-NEXT Call 11-12

Chapter 7: Characteristics of a DL/1 Database

Characteristics of a DL/1 Database 1
 Database Access Methods 2
 Characteristics of HSAM 4
 Characteristics of SHSAM 4
 Characteristics of HISAM 5
 Characteristics of SHSAM 6
 Characteristics of GSAM 7
 Characteristics of HDAM 8
 Pointers - HDAM 9
 Physical Structure - HDAM 10
 Characteristics of HIDAM 10-11
 DL/1 Database Reorganization Utilities 12

Chapter 8: Logical Relationships and Searching

Logical Relationships 1
 Secondary Indexes 2
 Secondary Index Segments 3-6
 Using Secondary Index for Processing 7
 Processing a Database with Secondary Indexing 8-12

Chapter 4: Database Retrieval Calls

Retrieving Segments from a DL/1 Database 1
 GET-UNIQUE (Gubb) Call 2
 GET-HOLD-UNIQUE (GHUb) Call 3
 Status Codes Returned After a GET-UNIQUE Call 3
 GET-UNIQUE Call Examples 4
 Indented Hierarchy Chart 5
 Programming Example: An Unqualified GET-UNIQUE Call 6
 Programming Example: A Qualified GET-UNIQUE Call 7-8
 GET-NEXT (GNbb) Calls 9
 GET-NEXT (GNbb) Call 9
 GET-HOLD-NEXT (GHNb) Call 10
 Status Codes Returned After GNbb or GHNb Call 10
 Programming Example: An Unqualified GET-NEXT Call 11-12
 Programming Example: The GET-NEXT Call 13
 GET-NEXT-WITHIN-PARENT (GNP) Calls 14
 GET-NEXT-WITHIN-PARENT (GNP) Call 14
 GET-HOLD-NEXT-PARENT (GHNp) Call 14
 Status Codes Returned After a GNPb Call 15
 Programming Example: The GET-NEXT-WITHIN-PARENT Call 16-19
 Processing Options for Retrieval Calls 20
 Position After Retrieval Calls 20
 PCB Mask Value After a Successful Retrieval Call 21
 PCB Mask Value After an Unsuccessful Retrieval Call 22

Chapter 5: Database Update Calls

The DELETE (DLET) Call 1
 DELETE CALL Format 1
 Status Code Returned After a DLET CALL 1
 GET-HOLD-UNIQUE Delete Sequence 2
 Programming Example: Deleting a Database Record 3-5
 Programming Example: Deleting a Segment 6
 Database After Deleting a Segment 7
 Programming Example: Deleting a Segment 8-9
 Position After a Delete Call 10
 REPLACE (REPL) Call 11
 Status Codes Returned After REPLACE Call 11
 Position After a Replace Call 11
 GET-HOLD-UNIQUE Replace Sequence 12
 Programming Example: Replacing/Updating a Segment 13
 Programming Example: Replacing/Updating a CUST-INFO Segment 15-16
 INSERT (ISRT) Call 17
 INSERT Call Formats 17
 Status Codes Returned After an INSERT Call 17
 Processing Options for INSERT Call for the Load 18
 Loading the Database 19
 Single Step Load 20
 Multiple Step Load 21-23
 Programming Example: 1-Step Load/First Step in a Multiple Step Load 24-26

Chapter 9: System Service Calls

System Service Calls 1
 CHKP/CHECKPOINT 1-2
 Symbolic/Extended CHKP Call Format 3
 XRST/RESTART 4
 XRST CALL Format 5
 Programming Example: The CHKP/XRST Call Sequence 6-7
 DL/1 Log 8
 Log Call Format 9
 STAT - STATISTICS 10
 Statistic Types 10

Chapter 10: DL/1 Debugging Aids

DFSDDLTO - DL/1 Test Program 1
 Status Statement Format 1-3
 Comment Statement Format 4
 Call Statement Format 4-5
 PCB Compare Statement Format 6
 User I/O Area Compare Statement Format 7
 Coding Examples 8
 Database Load Example 8
 Database List Example 9
 Database Update Example 10
 Get Statistics Example 11
 Log Record Example 11
 JCL for Executing the DFSDDLTO Program 12
 DL/1 Traces 13
 Trace Control Statement Format 13-14
 JCL for the DL/1 Trace 15
 JCL Requirements 15
