

**Chapter 1: Introduction**

Java Platform .....	1
Applets and Applications .....	2
Java Programming Language: Facilities and Foundation .....	3
Object Oriented .....	4
Data Types .....	5
Numeric Data Types .....	5
Character Data Types .....	5
Boolean Data Types .....	5
Arithmetic and Relational Operators .....	6
Arrays .....	7
Strings .....	8
Memory Management and Garbage Collection .....	9
Integrated Thread Synchronization .....	10

**Chapter 2: Programming Basics**

Simple First Program .....	1
Variables .....	2
Character Variables .....	2
String Variables .....	2
Integer Variables .....	2
Declaring Variables .....	3
Variable Names and Data Types .....	4
Variables and Class .....	4
Variable Scope Demo .....	5
Another Variable Scope Demo .....	5
Global Definition of Variables .....	6
Operators .....	7
Arithmetic Operators .....	7
Performing Calculations .....	8
Logical Operators .....	9
Relational Operators .....	10
Assignment Operators .....	11
Increment and Decrement Operators .....	12
Using Operators .....	13
Using a Conditional Operator .....	14
Bitwise Operators .....	15
Literals .....	16
Escape Codes .....	16
String Literals .....	17
Using Escape Sequence Codes .....	17
Statements and Expressions .....	18
Arrays .....	19
Prints Out the Command Line Arguments .....	20

**Chapter 3: Flow of Control Statements**

The if Statement .....	1
Coding an if Statement .....	2
The if/else Statement .....	3
The if/else/if Statement .....	4
The for Statement .....	5
For Loop Example .....	6
The while Statement .....	7
Sample While Loop .....	8
The switch Statement .....	9

**Chapter 4: String Manipulation**

Two String Classes .....	1
Creating a String .....	2
Creating a StringBuffer .....	2
Accessor Methods .....	3
More Accessor Methods .....	4
For the String Class .....	4
For the StringBuffer Class .....	7
Modifying StringBuffers .....	8
Inserting Characters .....	9
Converting Objects to Strings .....	10
The toString() Method .....	10
The valueOf() Method .....	11
Converting Strings to Numbers .....	12
Strings and the Java Compiler .....	13
Literal Strings .....	13

**Chapter 5: Class in Java**

Terminology and Concepts .....	1
Creating Classes .....	2
Subclasses, Superclasses, and Inheritance .....	2
Interfaces .....	2
Packages .....	2
Creating Objects .....	3
Declaring an Object .....	4
Instantiating an Object .....	5
Initializing an Object .....	6
Using Objects .....	7
Referencing an Object's Variables .....	8
Calling an Object's Methods .....	9
Cleaning Up Unused Objects .....	11
The Garbage Collector .....	11
Finalization .....	11
The Class Declaration .....	12
Declaring a Class's Superclass .....	13

Listing the Interfaces Implemented by a Class .....	14
Public, Abstract, and Final Classes .....	15
The Class Body .....	16
Declaring Member Variables .....	17
Declaring Constants .....	19
Controlling Access to Members of a Class .....	20
Private .....	21
Protected .....	22
Public .....	24

**Chapter 6: Error Handling**

Exception Handling: Purpose and Function Run .....	1
Basic Exceptions .....	2
The Try Block .....	3
Exception Handlers .....	4
Termination versus Resumption .....	4
Rethrowing an Exception .....	5
Performing Cleanup with Finally .....	7

**Chapter 7: Coding an Applet**

Purpose and Function .....	1
Applet Methods and Terminology .....	2
Applet Network Restrictions .....	3
Loading, Leaving and Returning to the Applet's Page .....	4
Methods for Milestones .....	5
Methods for Drawing .....	6
Methods for Event Handling .....	7
Methods for Adding UI Components .....	8
Methods for Using UI Components in Applets .....	9
Adding a Non-Editable Text Field to the Simple Applet .....	10
Executing an Applet .....	11
Loading Data Files .....	12
Displaying Short Status Strings .....	13
Displaying Documents in the Browser .....	14
Playing Sounds .....	15
Sound-Related Methods .....	15
Defining and Using Applet Parameters .....	16
Writing the Code to Support Parameters .....	17
Specifying the Applet Directory .....	18
Displaying Diagnostics to the Standard Output and Error Streams .....	19

**Chapter 8: Coding the UI Portion of an Applet**

AWT .....	1
AWT Classes .....	1
Components and Containers .....	2
An Applet with Five Components .....	3
Panel Class .....	5
Layouts .....	6
Border Layout .....	7
Flow Layout .....	8
GridLayout .....	9
GridBagLayout .....	10
The GridBagConstraints Variables .....	10
CardLayout .....	11
Event Handling .....	14
Event Helper Methods .....	15
Windows and Frames .....	16
Changes the Cursor State .....	17
Menus .....	19
Menu Program .....	20
Dialogs .....	22
Dialog to Change the Cursor State .....	23
Colors .....	24
Fonts .....	25

**Chapter 9: I/O and Streams**

Streams .....	1
File Class .....	2
I/O Exceptions .....	3
Input Stream Classes .....	4
Salient InputStream Methods .....	4
Reading a File to Standard Output .....	5
OutputStream Classes .....	6

**Chapter 10: Creating a UI with JFC**

Java Foundation Classes .....	1
Simple Swing Code .....	2
Importing Swing Packages .....	2
Swing: Choosing the Look and Feel .....	3
Top-Level Container .....	4
Setting Up Buttons and Labels .....	5
Adding Components to Containers .....	6
Adding Borders Around Components .....	7
Handling Events .....	8
Swing Components .....	9
Layout Management .....	10
Setting the Layout Manager .....	10
Putting Space Between Components .....	11

---

Event Handling .....	12
How to Implement an Event Handler .....	13
The JComponent Class .....	14
Customizing Component Appearance .....	15
Setting Component State .....	16
Getting Size and Position Information .....	17
Specifying Absolute Size and Position .....	18
Top-Level Containers and Containment Hierarchies .....	19
Adding Components to the Content Pane .....	20
Adding a Menu Bar .....	21
How to Make Frames (Main Windows) .....	22
Responding to Window-Closing Events .....	23
