

## Chapter 1: Getting Started

About C++ .....	1
Using C++ as a Better C .....	1
C++ Features .....	2
C++ Benefits .....	2
Source Files .....	3
Contents of Source File .....	3
Directives to the Preprocessor .....	4
Function Declarations and Definitions .....	4
Blocks .....	5
Preprocessor .....	6
Phases of Translation .....	6
Linking .....	8
Program Stages .....	9
Compile Process .....	10

## Chapter 2: Lexical Conventions

Operators .....	1
Unary operators .....	2
Overloaded Operators .....	3
Precedence of Operators .....	3
Punctuators .....	6
Braces ( {} ) .....	6
Semicolon ( ; ) .....	6
Colon ( : ) .....	7
Ellipsis ( ... ) .....	7
Equal sign ( = ) .....	8
Pound sign ( # ) .....	8
Comments .....	9
ANSI C Style Comment .....	9
Single Line Comment .....	9
Identifiers .....	11
Naming Rules .....	12
Case .....	12
Keywords .....	13
Literals .....	14
Integer Constants .....	14
Characters Constants .....	15
Floating-point Constants .....	18
String Literal .....	19

## Chapter 3: Language Elements

Variables and Constants .....	1
Variables .....	1
Constants .....	2
References .....	3
Creating a Reference .....	3
References to Pointers .....	3
Declaration .....	5
Definition .....	6
Scope .....	7
Storage Classes .....	9
automatic Storage .....	9
static Storage .....	10
Register .....	10
extern Storage .....	11
Data Types .....	12
Fundamental Types of the C++ Language .....	12
Sizes of Fundamental Types .....	13
L-Values and R-Values .....	14
Expressions .....	15
Statements .....	16
Categories of Statements .....	16
Expression Statements .....	17
Null Statement .....	17
Selection Statement .....	18
Iteration Statements .....	20
do Loop .....	22
Jump Statements .....	23
Declaration Statements .....	25
Compound Statements .....	26

## Chapter 4: I/O Streams and Functions

I/O Streams .....	1
Standard Output Stream .....	2
Formatted Output .....	3
Standard Input Stream .....	5
Functions .....	6
Prototype Declaration .....	7
Purpose of Prototype .....	7
Prototype Syntax .....	8
Definition .....	9
Storage Class .....	9
Return Type .....	10
Startup and Termination of Program .....	11
main() functions .....	11
Arguments in the Prototype of main() .....	12
Parsing C++ Command-Line Arguments .....	13
main() Function Restrictions .....	14
Inline Function .....	15

Default Function Argument Values .....	16
Overloading .....	17
Argument Type Differences .....	18
Restrictions on Overloading Functions .....	19

## Chapter 5: OOPS Programming

What is OOPS? .....	1
Classes .....	2
Encapsulation .....	3
Inheritance .....	3
Polymorphism .....	3
Structures, Class and Unions .....	4
Defining Class Types .....	5
Class Members .....	6
Member Function .....	6
Access Control Specifiers .....	8
this Pointer .....	9
Object .....	10
Reusing Code by Composition .....	14
Base and Derived Classes .....	16
Multiple Base Classes .....	18
Scope Resolution .....	19

## Chapter 6: Constructor / Destructor

Constructor .....	1
Tasks Performed by a Constructor .....	2
Declaring Constructors .....	2
Computer Generated Constructors .....	3
Default Constructor .....	3
Copy Constructor .....	4
Calls to Constructors .....	5
Destructor Functions .....	10
Destructors in Base and Derived Classes .....	10
Access Functions versus Public Data Members .....	11
const Objects and Member Functions .....	12
Member Objects .....	13
Polymorphism .....	14
Dynamic Binding .....	15

## Chapter 7: Overloading and Scope

Protected Members .....	1
Operator Overloading .....	3
Rules of Operator Overloading .....	4
Public, Private, and Protected .....	6
Derived Class .....	7
Inline Member Functions .....	8
Default Arguments .....	9
Pointer to a Function .....	10
Pointer to Derived Class .....	11
Virtual Function .....	12
Assignment Overload .....	14
Plus Operator Overload .....	15
Divide Overload .....	16
Overload that Returns No Value .....	17
Friend Overload .....	18
Using Header and Source Files .....	19

## Chapter 8: Storage Class Specifiers

Guidelines for Using Storage Class Specifiers .....	1
Free Store .....	2
new Operator .....	3
delete Operator .....	4
Free Store and Built-in Types .....	5
Using Initializer Lists .....	6
Assignment Operator .....	7
this Pointer .....	8
Copy Constructor .....	9
Static Members .....	10
Static Member Functions .....	11
Friends .....	13
Arrays of Class Objects .....	14
Handling Related Types in C++ .....	15
Virtual Functions .....	16

## Chapter 9: Stream I/O

Replacement for the DOS TYPE.COM .....	1
The ignore(), put(char), and write() Functions .....	2
C++ Stream Errors .....	3
ios:operator void*() and ios:operator! for Testing Stream Errors .....	5
Default Formatting Conventions for the Built-In Stream Inserter and Extractor Functions .....	7
The ios Format Control Member Functions .....	9
cout Formatting .....	10
Public Enumeration Mask Values for Formatting Flags .....	11
Function Name and Return Type/Action .....	12
C++ Stream Manipulators .....	13
Simple Stream Manipulators .....	14
Parameterized Stream Manipulators .....	15

---

Using cout Flags.....	16
Using File I/O.....	17
File I/O Streams.....	24
Output Stream 1.....	24
Output Stream 2.....	25
Input Stream 1.....	26
Input Stream 2.....	27
Sample Program File I/O Streams.....	28
fstream Object.....	29
open() Function.....	30
fstream open-Mode Enumerator Names and Uses.....	31
open-Mode Enumerators.....	31
open Modes: ios::nocreate ios::noreplace.....	32
Reading and Writing fstream Files.....	33
read() and write() Functions.....	34
File Positioning with C++ Streams.....	35
ios::seek_dir Enumerators.....	36
seekg() and seekp() Member Functions.....	36
