

Chapter 1: Introduction

Anonymous Class Types	1
Nested Class Declarations	2
Incomplete Declarations	3
Examples for Creating and Completing the Incomplete Type	4
Pointers to Class Members and Member Objects	5
Initializing Pointers to Member Objects	9
Conversion of Pointers to Classes	10
Friend Functions	12
Friend Declarations	14
Templates	15
Function Templates	16
Class Templates	18

Chapter 2: Inheritance

Virtual Base Classes	1
Single Inheritance	4
Multiple Inheritance	9
Multiple Base Classes	10

Chapter 3: Overloading

Overloaded Functions and Operators	1
Argument Type Differences	2
Restrictions on Overloaded Functions	3
Declaration Matching	4
Argument Matching	7
Address of Overloaded Functions	10
Overloaded Operators	11
General Rules for Operator Overloading	12
Increment and Decrement	14
Function Call	17
Subscripting	19
Class-Member Access	21

Chapter 4: File I/O

I/O Functions	1
Text and Binary Mode File I/O	2
Stream I/O Functions	3
Low-level I/O	6
Console and Port I/O	8
Directory-Control Routines	9
File Handling Routines	10
Buffer Manipulation	11
class streambuf	12
Important Member Functions of streambuf	16

Chapter 5: Performance and Tuning

_alloca()	1
calloc()	2
malloc()	3
free()	5
realloc()	6
_heapadd()	8
_heapchk()	9
_heapmin()	11
_heapset()	13
_heapwalk()	15
The operator new Function	18
Handling Insufficient Memory Conditions	20

Chapter 6: Advanced Topics

Inline Assembler	1
Variable Argument Lists	2
Enumeration Declarations	3
