

## Chapter 1: Introduction

Origins	1
Use of C	2
C Applications	3
C Features	5
Program Stages	6
Compile Process	7
Preprocessor	8
C Preprocessor	9
Compiling	10
Linking	11
Subdirectories	12
C Program Structure	13
C Program Description	14
C Functions	15
C Function Description	16
main() Function	17-18
Function Definition	19
Program Statements	20
OUTPUT Functions	21
Identifiers	22-23
Reserved Words in C	24
Escape Sequences	25
Comment Lines	26-27

## Chapter 2: Datatypes in C

Datatypes, variables and constants	1
C Character Types - (char)	2
C Integer Types (int)	3
Variables	4
Integer Variable	5-7
Variable Types	8
Declaring Integer Variables	9-10
Long and Short Integers	11
Integers	12
Float Type	13
Float	14
Float Example	15
Double Type	16-17
Alternate Number Systems	18-19
Special Constants	20
Constants	21-22
Initializing Variables	23

for Loop	20-21
Structure of the for Loop	22
Multiple Statements in Loops	23-24
Multi-statement Loop Body	25
Drawing a Line with a Graphics Character	26
while loop	27
ASCII Revisited	28-29
continue Statement	30
break Statement	31
return() Statement	32-33
null Statement	34
labeled and GOTO Statements	35
BREAK COMMAND	36
BREAK and CONTINUE Commands	37

## Chapter 6: Aggregate Datatypes

Arrays	1
Declarations	2
Storage	3
Arrays	4-5
Initializing an Array	6-7
Referencing Array Elements	8-11
Multi-dimensional Arrays	12-14
Structures	15
A simple Structure	16
Declaring a Structure Type	17
Defining Structures	18
Initializing Structures	19
Referencing Structure Members	20
Nested Structures	21
Array of Structures	22
Accessing Members of Array of Structures	23
Array of Structures	24-25

## Chapter 7: Function and Storage Classes

Functions	1
Function Structure	2
The Benefits of Using Functions	3
Function Definition	4-5
Declaration	6-7
CALL to Function	8-9
Call By Value	10-11
Parameters	12-15
Scoping Rules	16
Visibility of External Variables	17
Storage Classes	18
Summary of Storage Classes	19
Storage Class Specifiers auto	20

## Chapter 3: Operators and Expressions

Operators and Expressions	1
Arithmetic and Assignment Operators	2-3
Assignment and While Loop	4
Unary and Binary Operators	5-6
Compound Operators	7-9
Increment Operator	10-11
Precedence and Associativity	12-13
Precedence and Associativity In C Statements	14-15
Data Type Lengths	16
Relational and Equity Operators	17
Logical Operators	18
Bitwise Operators	19
Shift Operators	20
Unary Operators	21
For Loop and Named Constant	22

## Chapter 4: Simple I/O Operations

Standard Libraries	1
Terminal Character I/O Routines	2-4
String I/O	5
Gets and Puts FUNCTIONS	6-7
Formatted I/O: printf()	8-9
Format Specifiers	10
Flag Characters for printf()	11-12
Field-Width Specifiers for printf()	13-16
Precision Specification	17-19
Field Type Format Specifiers for printf()	20
Printing Graphic Characters	21-22
Printing Strings	23
Printing Characters	24
scanf() Function	25
scanf() and the Address operator (&)	26-27
Format Specifier for scanf() and printf()	28
scanf() Function	29-30

## Chapter 5: Major Program Statements

Loop Control	1
Statements	2
SIMPLE Statements	3
Compound Statements	4
Conditional Testing - if/else	5
Switch/Case	7-10
Conditional operator	11-13
Conditional testing- do while	14-15
While Statement	16-18
for Statement	19

auto Example	21
static	22
extern	23
register	24-25

## Chapter 8: Pointer Processing Arrays and Strings

Pointer Variables	1
Pointer Values and Addresses	2
Declaration of Pointers	3
Use of Pointers	4
Initialization of Pointers	5
Pointer notations	6-7
Living Dangerously	8
Pointer Arithmetic	9-10
Precedence and pointers	11
Pointers and Character Strings	12
String Null Terminator	13
String Functions	14
Strings Initialized as Pointers	15
Arrays of Pointers	17-25

## Chapter 9: Functions, Pointers and Aggregates

Functions	1
Passing Arguments/Parameters to a Function	2
Function Declaration	3-4
Passing Arrays as Function Parameters	5
Passing Structures as Function Parameters	6
Command Line Parameters	7
Line Command args	8-9

## Chapter 10: Basic File I/O

stdio.h Library	1
Constants	2
File Pointers	3
Using the fseek() Function to Control the File Pointer	4
File Structure	5
fopen() Function	6
fopen() Function	7
TEXT and Binary	8
fclose() Function	9
fread and fwrite Function	10-12
Character and Formatted I/O - fgetc Function	13
fputc() Function	14
fprintf() Function	15
fscanf() Function	16-18
