Chapter 1: Getting Started
Purpose of Testing 1
Testing Implementation 2
Requirements-Based Testing 2
Developing a Test Plan 2
Test Plan Approaches 3
Waterfall Approach 3
Evolutionary Approach 3
Optimization 4
Unit Testing 5
Integration Testing 6
Regression Testing 7
Building a Library 7

Chapter 2: Application Performance
Why Software Fails? 1
Improperly Constrained Input 1
Improperly Constrained Stored Data 2
Improperly Constrained Computation 3
Improperly Constrained Output 3
Performance Tuning 4
Tuning Cycle 5

Chapter 3: Code Coverage Analysis
Purpose and Features 1
Structural Testing and Functional Testing 1
Assumptions 2
Statement Coverage 3
Decision Coverage 4
Condition Coverage 5
Multiple Condition Coverage 6
Condition/Decision Coverage 7
Modified Condition/Decision Coverage 8
Path Coverage 9
Coverage Goal for Release 10
Intermediate Coverage Goals 10

Chapter 4: Debugging
Definition and Introduction 1
Testing and Debugging C Code 2
C Code - Steps in Debugging 3
Bug Types 4
C Specific Problems 5
Preprocessor 5
Strong Systems Dependency 5
Weak type System 6
Explicit Storage Allocation and Deallocation 6
Name Space Pollution 6
Incremental Building/Linking 7
Build Process 7

Chapter 5: Testing Techniques
Core Dumps 1
Debugging Techniques 2
Compiler's Features 2
RTFM Technique 4
Printf() Debugging and Testing 5
Guidelines 5
Assertions: Defensive Programming 7
Visual Studio Analyzer 8
Exception Management 10
Absolute Termination 11
Conditional Termination 13
Non-Local Goto 15
Signals 18
Global Variables 20

Chapter 6: Testing Tools
Editor 1
Version Management System 1
Debugger 2
gbd 3
emory Allocation Debugging Tools 5
System Call Tracers 5
Profilers 6
lint 6
Comments for Controlling lint 8
lint Directives 8
