

Chapter 1: Introduction

Lesson 1: .NET Platform and Visual Studio	2
Objectives	3
C Features	4
.NET Framework	5
Relationships of C Source Code and the .NET Framework	6
C and .NET	7
.NET Blueprint Microsoft's Vision	8
MSIL and Common Type System	9
.NET - from Our perspective	10
What are .NET Programs?	11
Framework Class Libraries	12
How Translation Works in .NET	13
Result is Managed by CLR	14
Parts of the CLR	15
Lesson 2: Compiling and Running	16
Objectives	17
Compile and Run the Program	18-19
Visual Studio and Windows	20
Windows based Application Development Tools	21
Create a Windows Application Project	22-23
Windows Project Development	24
Simple Windows Application	25-28
Compiling and Running the Program	29-30
Console Application	31
Compile and Run Program	32
Console Application Description	33-34
Window Application with Controls	35
Event Processing	36
GUI Classes	37-38
Creating Code Library Assemblies	39
Component Program	40
Compiling the Library	41
Test Library Routine	42

while Loop	74
Do Loop	75-78
for Loop	79
Initializer List	80
Boolean Expression	81
Iterator List	82
for Example	83
Loop Continues	84
foreach Loop	85-87
foreach Example	88
Lesson 4: Methods	89
Objectives	90
Method Structure	91
Method Syntax	92-93
Method Example	94-98
Local Variables	99
Return Type	100
Static and Instance Method	101
Method Reference	102-103
Methods with Parameters Example	104-109
Passing Parameters	110-111
this Reference	112
ref Parameter	113
out Parameter	114
params Parameter	115
Lesson 5: Namespaces	116
Objectives	117
Namespaces - Purpose	117
Namespace - Example	119-120
Nested Namespaces	121-123
Calling Namespace Members	124

Chapter 3: OOP Techniques

Lesson 1: Class Basics and Example	2
Objectives	3
Class and Constructors	4
Class Example	5-7
Default Constructor	8-9
Instance and Static	10-11
Static Method	12-13
Static Constructor	14
Destructors	15

Chapter 2: Language Fundamentals

Lesson 1: Console Application	2
Objectives	3
Basic Program	4-5
Class Declaration	6
Main Method	7
Static Modifier	8
Method Return Type	9
Console.WriteLine	10
Comments	11
Braces in Code	12
Passing Args	13 - 14
Display Variables	15 - 16
Conversational Programming	17 - 18
Public Class	19
Console.WriteLine	20
Console.ReadLine	21
Lesson 2: Variables and Operators	22
Objectives	23
Variables	24
Numeric and Boolean Types	25
Float and String Types	26
Boolean Type	27-28
Integral Types	29
C Integral Types	30
Floating Point and Decimal	31-32
string Type	33
Escape Sequences	34
Verbatim Literal	35
C Operators	36-37
Unary Operators	38-39
Binary Operators	40-42
Array	43-47
Lesson 3: Control Statements	48
Objectives	49
if Statement	50
Input an Integer Value	51
if Example	52-54
if Format	55-56
Another if Format	57
ifelse Statement	58
AND Operator	59
switch Statement	60
switch Example	61-62
switch Characteristics	63-64
Branching Statement	65
default Choice	66
break Statement	67
Combine case Statements	68
case with a goto	69-70
while Loop	71-72
while Example	73

Lesson 2: Classes Inheritance	16
Objectives	17
Inheritance Example	18-20
Communicating Between Base and Derived Class	21-24
Polymorphism	25
Virtual Modifier	26
Virtual Modifier Example	27-29
Implementing Polymorphism	30-31
Properties	32-33
Property - Create and Use	34-37
Read/Only and Write/Only Properties	38
Auto Implemented Properties - Creating	38-40
Lesson 3: Encapsulation	41
Objectives	42
Objects - Creating	43
Encapsulation - Purpose	44
Type Member Access Modifiers	45-46
Access Modifiers	47
Public Access	48
Private Access	49-50
Protected Access	50-51

Chapter 4: Windows Applications

Lesson 1: Form Processing	2
Objectives	3
Windows and Forms	4
Changing the Name of a Form	5
Displaying Text on a Form's Title Bar	6
Changing a Form's Background Color	7
Adding an Image to a Form's Background	8
Giving a Form an Icon	9
Windows Forms in C	10
Resize Form	11
Set Title	12
Exit Button	13
Preventing a Form from Appearing in the Taskbar	14
Message Box	15-16
Programming Textbox	17
Programming Combo Box	18
Programming List Box	19-20
Programming Radio Buttons	21-22

Lesson 2: Menus	23
Objectives	24
Main Menu Strip and Context Menus	25
Menu Strip	26
Logic in Menus	27
Close Logic	28
About Sub-Menu	29
Context Menu	30-31
Calculation from Menu	32
Enable Menu	33
Menus on Windows Forms	34
Lesson 3: ListView	35
Objectives	36
ListView Control	37-38
VB Type Input Box	39
Add Items	40
Add to the Columns	41
Clear and Remove Items	42
ListView Views	43
ListView Control	44
Lesson 4: Tabs	45
Objectives	46
Tabs - Purpose	47
Creating a Tabbed Form with C#	48
Tab Operations	49-51
Resizing Tabs with C#	52-54
Lesson 5: Miscellaneous Controls	55
Objectives	56
Color Dialog Box	57
Color Dialog Box - Making Available	58
Color - Setting	59
Selected Color, Determined	60
File Common Dialog Box	61
Open File Dialog Box	62
Open File Example	63-64
Open Dialog Box - Characteristics	65-67
ShowDialog Method	68
Print Dialog Box	69-70
PrintDialog Class	71
PrintDocument Object	72-74
Progress Bar	75
ProgressBar Properties	76-77
Step Property	78
Link Labels	79
Timer	80-82
Track Bar Control	83-84
Track Bar Control Example	85

Chapter 6: Practical Programming	
Lesson 1: Collections	2
Objectives	3
Collection - Purpose	4
Array Collection Type	5-6
ArrayList and List Collection Types	7-8
ArrayList	9-11
ArrayList Example	12-14
Hashtable	15-21
Stack	22-23
Stack Example	24-25
Queue	26-27
Queue Example	28-29
SortedList Collection	30-31
SortedList - Declaring	32-33
SortedList Contents - Modifying	34
SortedList - Updating Using the Key	35
Updating Using the Index Number	36-37
Removing an Item	38
Retrieving an Item by Index	39
Retrieving a Key by Index	40
Iterating Using DictionaryEntry Objects	41-42
Values	43
Keys	44
GetValueList and GetKeyList Methods	45
ContainsValue	46
IndexOfKey	47
Lesson 2: Indexers	48
Objectives	49
Indexers - Purpose	50
Indexer Example	51-54
Overloading Indexers	55-59
Lesson 3: struct	60
Objectives	61
struct - Features	62
struct Type - Creating	63
struct Example	64
struct - Using	65-66
struct - Alternate Way of Instantiating	67
Overloading struct Constructors	68
Methods in a struct	69
Instance in a Constructor	70-71
Lesson 4: Interfaces	72
Objectives	73
Interfaces - Purpose	74-75
Interfaces Implemented by Class	76
Interface - Defining	77-78
Interface - Using	79-80
Inherited Interfaces	81-82

Chapter 5: Web Applications and Web Forms	
Lesson 1: Basic and Simple Applications	2
Objectives	3
ASP.NET	4
Web Forms Advantages	5-6
Create a New Project	7
ASP Code for a Default Form	8
Attributes	9
Web Related Methods	10
Files that Make Up an ASP.NET Web Application	11-12
Adding Controls to a Web Form	13
HTML Code for Textbox and Button	14
Declaring Controls	15
HTML versus Server Controls	16-17
Responding to Server Control Events	18-19
Simple Login Application	20-22
Recompiling	23
Lesson 2: Validation Controls	24
Objectives	25
Validation Controls	26-27
Validation Properties	28-29
RequiredFieldValidator	30
Validation Example	31-35
Setting Up the User Interface	36
Lesson 3: Managing State	37
Objectives	38
Stateless versus State Application	39
Managing State on the Client	40
Cookies	41
Sessionless Cookies	42
Cookies Property	43
View State	44-45
HTML Hidden Control	46
Query String	47
Managing State on the Server	48
Session State	49
Session-level State Storage	50
Application State	51

Lesson 5: Exception Handling	83
Objectives	84
Exceptions	85
trycatch Blocks	86-87
Catch an Exception	88
Specific Exceptions	89
Unhandled Exceptions	90
Finally Blocks	91-92
Lesson 6: enums	93
Objectives	94
Enums Defined	95
Enum Benefits	96
Enum - Creation	97-99
Enums - Using	100-102
Enum Techniques	103
Enum Conversions	104-106
GetEnumFromUser Example	107
GetNames Example	108
ListEnumMembersByValue Example	109
Chapter 7: Building Applications	
Lesson 1: Framework Class Library	2
Objectives	3
.NET Framework Class Library	4
.NET Framework Class Library - Main Parts	5
Common Namespaces	6-9
System Namespace	10-11
System.Collections Namespace	12-14
System.Data Namespace	15-17
System.Drawing Namespace	18
System.IO Namespace	19-20
System.Text Namespace	21-23
System.Threading Namespace	24
System.Timers Namespace	25
System.Web Namespace	26-27
System.Web.Services Namespace	28
System.Windows.Forms Namespace	29-30
Lesson 2: Overriding Core Object Methods	31
Objectives	32
Overriding Core Object Methods	33
Override the ToString Method	34-35

Lesson 3: Formatting Strings and Numbers	36
Objectives	37
Formatting Strings	38-40
Strings	41
Number Formatting	42
Custom Number Formatting	43
Date Formatting	44
Custom Dates and Time	45
Digits After Decimal Point	46 - 48
Thousands Separator	49
Align Numbers with Spaces	50
Custom Formatting for Negative Numbers and Zero	51
Modifying Strings	52-55
Split Strings	56-57
Search Strings Using String Methods	58
String Search	59-60
Determine Whether a String Represents a Numeric Value	61
Numeric Check	62
Lesson 4: File I/O	63
Objectives	64
File Support	65
File Existence	66-67
File Creation	68-69
Access to a File	70-71
File Sharing	72-73
Mode of a File	74-75
Obtaining Information About Files Folders and Drives	76-81
Copy Delete and Move Files and Folders	82
Copy Code	83-85
Delete Files / Directories	86-90
Write to a Text File	91-92
Read from a Text File	93-94
Read a Text File One Line at a Time	95
Write to the Application Event Log	96
Serialization	97-101
Serialized Object - Using	102-103
Chapter 8: ADO.NET	
Lesson 1: ADO.NET Background	2
Objectives	3
Design Goals for ADO.NET	4
XML and ADO.NET	5
ADO.NET Components	6-8
ADO.NET Architecture	9
DataReader or a DataSet - Choosing	10-11
.NET Framework Data Providers	12-14
ADO.NET DataSet	15-16

Lesson 2: Connection	17
Objectives	18
SqlConnection Object	19
SqlConnection Object - Creating	20
Connection Strings	21
SqlConnection - Using	22
SqlConnection Example	23-24
Open a Connection	25
SqlCommand	26
Close a Connection	27-28
Lesson 3: Commands and SQL	29
Objectives	30
SqlCommand	31
SqlCommand Object - Creating	32
SqlCommand - Using	33
Inserting Data	34-35
Updating Data	36
Deleting Data	37
Single Values - Getting	38
Reading Data with the SqlDataReader	39
SqlDataReader Object - Creating	40
Reading the Data	41-43
SQLReader - Using	44-47
Disconnected Data - The DataSet and SqlDataAdapter	48-50
Design Issues	51
DataSet Object - Creating	52
SqlDataAdapter - Creating	53
SqlDataAdapter - Updating with	54-56
Filling the DataSet	57-58
DataSet - Using	59-60
Updating Changes	61
Chapter 9: Web Services	
Lesson 1: Web Service Background	2
Objectives	3
Web Services Background	4-5
XML Standard	6
Web Services Standards	7
SOAP	8
WSDL	9
UDDI	10
Web Services - Benefits	11
Web Services - Advantages	12-13
Web Services - When to Use	14
Web Service Stack	15-16
DISCO	17
UDDI	18
Web Service - Describing	19
Web Service Application	20

Lesson 2: Develop a Web Service Application	21
Objectives	22
Web Service Project - Create	23-24
Generated Code	25-26
Running the Service	27-29
Deploy the XML Web Services	30-31
