

**Chapter 1: Relational Databases**

Flat File Database Theory.....	1
Relational Database Theory.....	2
Referential Integrity.....	4
The One-to-One Relationship.....	4
The One-to-Many Relationship.....	4
Designing Tables for Relationships.....	4
Creating Relationships.....	5-6
Referential Integrity and Data.....	7
Cascading Updates and Deletes.....	8
The Relationship Window.....	8

**Chapter 2: Designing a Selection Query**

Selecting Records with Queries.....	1
QBE: Query By Example.....	1
Designing a Query.....	1-2
Selecting Fields.....	3
Inserting and Deleting Fields.....	3
Selecting Records.....	3
Sorting Records.....	4
Using Hidden Fields.....	5
Running a Query.....	6
Saving a Query.....	6
Using an Existing Query.....	6

**Chapter 3: Using Operators and Compound Criteria**

Using Operators.....	1-2
Working with Date and Time Fields.....	3
Using the Expression Builder.....	4

**Chapter 4: Advanced Queries**

Using Totals.....	1-2
Working with Groups.....	3
Action Queries.....	4
Making a New Table.....	5
Deleting Records with a Query.....	6
Updating Records with a Query.....	7
Appending Records to a Table.....	8
Problem Actions.....	9
Using Query Wizards.....	10
Querying for Top Values.....	11
Parameter Query.....	12
Make Table Query.....	13
Join Properties.....	14
Finding unmatched Records.....	15

**Chapter 5: Queries with Multiple Tables**

Joining Tables for Queries.....	1
Equi-Joins.....	1
Outer Joins.....	2
Inner Joins.....	3
Specifying the Type of Join.....	4
Retrieving Data from Linked Tables.....	4
Displaying Table Names with Field Names in the QBE Grid.....	5-6
Adding and Removing Tables.....	6
Using Totals with Multiple Tables.....	6
Precautions When Using Multiple Tables in Queries.....	6
Crosstab Queries.....	7

**Chapter 6: Creating Forms**

Recognizing the Advantages of Forms.....	1
Identifying the Components of a Form.....	2-3
Sources of Form Data.....	4
Types of Forms.....	5
Opening a Form.....	6
Creating a Form with AutoForm.....	7
Creating a Form with Form Wizard.....	7
Sources of Form Data for Form Wizard.....	8
Viewing a Form.....	9
Entering Data through a Form.....	10
Saving a Microsoft Access Record.....	10
Previewing a Form.....	10
Printing a Form.....	11
Closing a Form.....	11

**Chapter 7: Modifying Forms**

Types of Controls.....	1
Creating Bound Controls.....	2
Creating Unbound Controls.....	2
The Design Window.....	2
Identifying Tools.....	3
The Toolbox.....	4
Selecting Controls.....	5
Using the Ruler.....	6
Resizing the Controls on a Form.....	6
Using the Snap To Grid Option.....	7
Moving the Controls on a Form.....	7
Deleting Controls from a Form.....	7
Changing Form Size.....	8
Changing Fields and Labels.....	8
Adding Labels to a Form.....	8
Changing Control Properties.....	9
Setting Properties.....	10
Closing the Properties Window.....	10

**Chapter 8: Main Forms and Subforms**

Creating Main and Subforms.....	1
Using Main Forms and Subforms.....	2-3

**Chapter 9: Creating Basic Reports**

Creating a Report with AutoReport.....	1-2
Creating a Report with Report Wizard.....	2
Sources of Report Data.....	3
Single-column Reports.....	3
Groups/Totals Reports.....	4-5
Mailing Labels.....	6
Summary Reports.....	7
Tabular Report.....	8-9
MS Word Mailmerge.....	10
Reports in Design View.....	11
Reports in Sample Preview.....	12
Reports in Print Preview.....	13
Printing Reports.....	13
Creating Reports Manually.....	13
Converting Forms to Reports.....	13
